EDUCATION

Utrecht University, Utrecht | *M.Sc. Water Science and Management* **2026**

- GPA: 7.34 (Dutch Grading System)
 - Related Coursework: Drinking Water and Sanitation, Sustainable Water Resources Management, Quantitative Water Management
 - Thesis: "The use of molecularly imprinted polymers for the removal of per- and polyfluorinated alkyl substances"
- Supervisors: Dr. Zech & Dr. van Leeuwen · Grade: expected July 2026*

Bauhaus University, Weimar | *B.Sc. Environmental Engineering* **2024**

- GPA: 2.83 (German Grading System)
 - Related Coursework: Basic studies in mathematics and natural sciences; fundamental studies in all applied civil engineering subjects
 - Thesis: "Study on the precipitation of organic suspended solids in raw water using the case study of a drinking water treatment plant in Kikinda, Serbia"
- Supervisor: Prof. Dr.-Ing. Beier · Grade: 1.7*

University of Technology, Vienna | *Erasmus Exchange* **Winter 2023/2024**

- Overall Grade: 1.83 (Austrian Grading System)
- Related Coursework: Laboratory practical on resource and waste management, Ecology, Membrane Technology

EXPERIENCE

Project Intern **March 2024 – June 2024**

UNIHA Wasser Technologie GmbH *Kikinda, Serbia*

- Managed overall plant operations during commissioning stage
- Supervised and directed laboratory activities throughout commissioning phase
- Guided start-up and commissioning of reverse osmosis system

Research Assistant **April 2023 – September 2023**

Bauhaus University *Weimar, Germany*

- **Project Konnekt** – Institute of Urban Water Management and Sanitation & Technology for Urban Material Flow Utilization
- Research in circular economy transformation projects
- Identifying site-specific implementation strategies for sustainable regional development

Research Assistant **July 2022 – December 2022**

Bauhaus University *Weimar, Germany*

- **Project MeSRa** – Institute of Urban Water Management and Sanitation
- Assisted in laboratory setup and operation of gravity-driven membrane bioreactor
- Analysed wastewater samples to monitor treatment performance

SKILLS & INTERESTS

Language German (native), English (professional proficiency), Dutch (Reading and listening comprehension – Attending a Dutch language course at the Babel Language Institute, Utrecht)

Technical Microsoft Office, Python, MATLAB, AutoCAD

Water Analysis SAC, turbidity, pH, flocculation & filtration testing

Inorganic Analysis Titration, centrifugation, dilution series, slag, ash & residue characterisation

Scientific Interests Water treatment & purification, sustainable water resource management, drinking water quality

Interests Biking, cooking, skiing, hiking, natural sciences
